Languages

Hebrew - Mother tongue

English - High level

Summary

I am a motivated Full Stack Engineer excelling in web development. Proficient in problem-solving, I am committed to learning more about evolving frameworks and technologies. Eager to contribute my skills and passion to my next position.

Experience

Fullstack developer at IDF: Jan 2023 - Feb 2024

I developed a profound understanding of programming during my time on the idf, with a focus on web development, specializing in the MERN stack. Additionally, I acquired proficiency in C language and Java (OOP). This experience equipped me with a comprehensive knowledge of both the foundational principles and practical application of these technologies.

freelancer: Aug 2021 - present

As a freelancer, I crafted tailored landing pages for clients and developed custom systems to streamline company operations. With expertise in both frontend and backend development, I excelled in delivering high-quality solutions while prioritizing effective communication and collaboration. My track record reflects my ability to meet diverse client needs, making me an ideal fit for a fullstack developer role.

Education

Afeka College: Sep 2023 - March 2024

Completion of a Practical Engineer course.

Speed Tech(made by the IDF): Sep 2022 - Sep 2023

During my time in the army as developer, I participated in a course aimed at expanding my knowledge as a full-stack developer and in network security as an IT professional. Through this course, I learned how to defend websites from cyber attacks.

Ginzburg Yavne: Sep 2017 - Sep 2020

Full matriculation in computer science.
