Summary

I am a motivated Full Stack Engineer who completed a "Speed Tech" accelerated course by the IDF, excelling in web development. Proficient in problem-solving, I am committed to learning more about evolving frameworks and technologies. Eager to contribute my skills and passion to my next position.

Practical experience

Game Zone (Mern,Docker): 🔗
A gaming site that leverages a combination of advanced algorithms and strict CSS design.

CSStore (Next.js,Supabase): 🔗
E-commerce platform to get the perfect custom CSS for your site.

Studio Trainer (Flutter,Dart):
Currently working on an app for scheduling appointments for a studio trainer as a freelancer.

Education

Afeka College: Sep 2023 - March 2024
Completion of a Practical Engineer course.

Speed Tech(made by the IDF): Sep 2022 - Sep 2023
I developed a profound understanding of programming languages during my time on the course, with a focus on web development, specializing in the MERN stack. Additionally, I acquired proficiency in C language and Java (OOP). This experience equipped me with a comprehensive knowledge of both the foundational principles and practical application of these technologies.

Ginzburg Yavne: Sep 2017 - Sep 2020
Full matriculation in computer science.

Military Service

At the onset of my military service, I served in a printing house, gaining experience in graphics systems. Recognizing my aptitude and affinity for the computer field, the commanders provided me with the opportunity to undergo a full-stack course during my service, called 'Speed Tech.' I successfully completed the course and then returned to my position in the printing house until discharge.
